

Food Facility Registration Verification Statement

Manufacturing partner | U.S. FDA food facility registration document summary

BRAND	Dogevera	ISSUED BY	ViralMomentum LLC
DOCUMENT ID	DGV-FFR-2026-001	ISSUE DATE	16 September 2026
SOURCE DOCUMENT	2026 Certificate of Registration	SOURCE ISSUER	Registrar Corp

Purpose of this statement

This statement summarizes manufacturing-facility registration documentation reviewed and retained by Dogevera. It provides an English-language reference for customers, business partners, and platform reviewers. The underlying source document can be provided privately for legitimate verification where appropriate.

Documentation summary

Facility identity	Withheld from public copy - retained on file
Facility registration category	U.S. FDA food facility registration
FDA registration number	Withheld from public copy - retained on file
UFI / DUNS	Withheld from public copy - retained on file
Registration status in source	Source certificate states the facility registration was verified as currently effective by Registrar Corp
U.S. Agent for FDA communications	Registrar Corp
Certificate date	17 November 2025
Certificate validity stated in source	Through 31 December 2026, unless the registration is terminated after issuance

IMPORTANT CLARIFICATION
Food facility registration is not FDA approval, certification, or endorsement of Dogevera or any Dogevera product. The source certificate is issued by Registrar Corp, not by the U.S. Food and Drug Administration.

Scope and limitations

This is a Dogevera-issued summary of the referenced facility-registration documentation. It is not a government certificate, laboratory test report, or statement of product approval. It does not by itself establish product identity, nutrient composition, contaminant levels, or batch-specific safety. Separate laboratory reports should be used for those claims.

The original source document remains the authoritative record. Supplier identity, FDA registration number, and UFI/DUNS are withheld from this public copy for supply-chain confidentiality and to reduce misuse of facility-registration information. They may be provided privately where a legitimate reviewer requires verification.
